Chucks/Arbors

**Innovation
for your
efficiency**

ETP Transmission AB has developed and manufactured hydraulic chucks and arbors for more than 40 years under the brand name ETP HYDRO-GRIP for the woodworking industry.

We are a global company and our customers are the leaders within their respective segments. This is the way we like it, working with people that demand the absolute best from us means we are constantly developing and improving ourselves and our products. It is your challenges that drive us forward.

This catalogue covers our standard products for the woodworking industry and in addition to this we also manufacture customized designed products for all types of wood machining.

**In need of
hydraulic
sleeves?**

**See our separate
Sleeve Catalogue!**

Quick, easy and precise

It takes just a few seconds to get perfect centering and fastening of your tools when attached to an ETP HYDRO-GRIP. The extremely high precision achieved by using ETP HYDRO-GRIP results in minimal runout, unrivalled repeatability and the best possible surface finish at super high feed speeds.

Our customers and worldwide users can confirm what this means in terms of dramatically improved cost-effectiveness.

75 mm

ER
collet holder
replacement

ETP HYDRO-GRIP® COMPACT HSK 63F

The short design of 75 mm makes COMPACT your ideal replacement for any ER collet holder. Allowing more and more users to fully benefit from all the positives of hydraulic clamping such as easy handling and decreased tool wear. COMPACT has a very compact and robust design. Tools changes are made quickly, easily and with a high level of precision. The high clamping force guarantees a secure clamping of your cutting tools. With a minimum tool runout a good surface finish is achieved along with an extended tool life. COMPACT can be used with reduction sleeves for maximum flexibility.

- Excellent runout

ETP HYDRO-GRIP® SLENDER HSK 63F

HYDRO-GRIP SLENDER is extremely user friendly which means quick and easy tool changes. It has a tough and compact design and it is the most slender chuck in our range. A safety feature prevents the tool from falling out when the chuck is not pressurized. The tool shank must be equipped with a thread corresponding to the safety screw size.

Benefits and features

- Quick, easy and independent tool change
- Multiple tool combination
- Optimized run time for each tool
- High performance and excellent run out

ETP HYDRO-GRIP® COMBO HSK 63F

The new COMBO let you enjoy all the benefits using a hydraulic chuck for your router bits and a hydraulic arbor for your profile tools at the same time. Perfectly centered and balanced.

Quick and easy tool changes independently for each tool, router bit vs. profile tool. The COMBO let you optimize your tool design for maximum performance and cost effectiveness.

 Center thread, M8x1.25, for axial length adjustment screw
 (screw not included)

Profile tool:

Recommended tolerance - H7
 Centering only.
 Security disc and 3 screws should always be mounted.
 Both Router bit and Profile tool has to be mounted before clamping.
 Security disc and 3 screws included in shipment.

Safety device

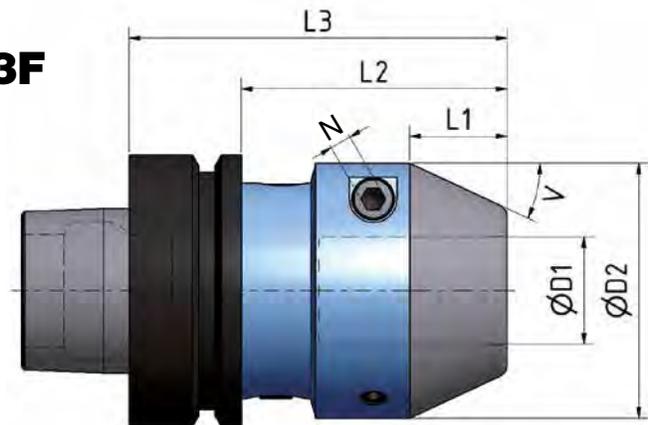

Benefits and features

- World famous safety device.
- Compact design.
- Quick, safe and easy tool change.
- Perfect runout and repeatability.

ETP HYDRO-GRIP® G3 HSK 63F

HYDRO-GRIP type G3 is historically very tough but the new generation has an even more compact design. The hydraulic chuck is equipped with our well known built in safety device. The safety device prevents the tool from falling out when the chuck is not pressurized. Pressurizing is carried out with an allen T-wrench. The G3 chuck allows quick, safe and easy tool changes and perfect runout and repeatability.

PENCIL DESIGN

Benefits and features

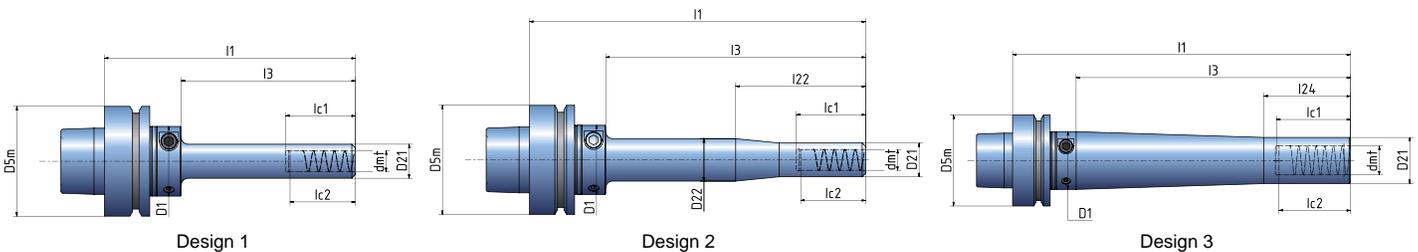

- For drilling to finishing
- Pencil design enabling machining in deep cavities and complex components
- High clamping force

ETP HYDRO-GRIP® PENCIL HSK 63F

ETP HYDRO-GRIP® PENCIL is with its extreme slim design one of the most versatile holder on the market. An extensive range of standard dimensions and lengths optimizes your productivity when machining deep cavities and complex components.

- Runout accuracy: ≤ 0.004 mm at $2.5 \times d_{mt}$ (max. 50 mm)
 ≤ 0.00016 inch at $2.5 \times d_{mt}$ (max. 1.969 inch)
 ≤ 0.007 mm at $2.5 \times d_{mt}$ at length $l_1 > 125$ mm
 ≤ 0.00028 inch at $2.5 \times d_{mt}$ at length > 4.921 inch
- Balancing grade: G 2.5 at corresponding rpm - see in table below
- Tool shank h6 or h7 can be used
- Can be used with reduction sleeves, see page 15-16 for assortment

Hydraulic arbors

**New
extended
range**

ETP HYDRO-GRIP® GEW2 PowerLock

HYDRO-GRIP GEW2 is our hydraulic precision arbor for the **PowerLock system**. This combination will give you all the benefits from both the hydraulic centering function and the PowerLock system. The GEW2 arbor expands uniformly and is the ultimate centering and fastening solution for your tools.

The pressurizing is carried out by using an allen T-wrench and the mechanism is well protected from dust behind a sealed plug. Furthermore the arbor has a thread and a locking nut that makes the tool assembly extremely quick and easy.

Benefits and features

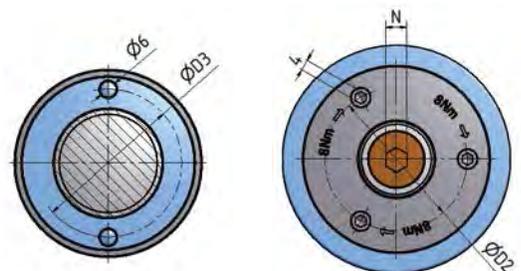

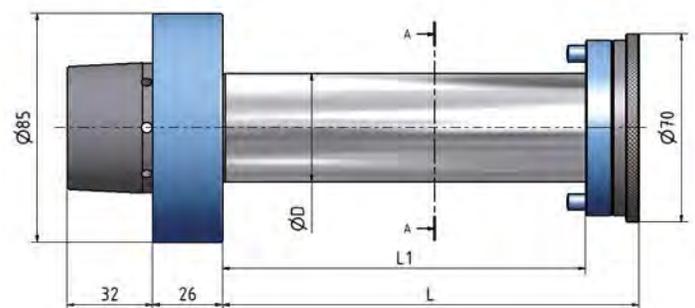

- Multiple tool assembly.
- Easy to pressurize with an allen T-wrench.
- Sealed dust plug.
- Ultimate centering and fastening.

Benefits and features

- Quick and precise tool assembly
- High performance and balance
- Easy interchange of tools between hydraulic- sleeves and arbors
- Combination with ETP CUBIT mini

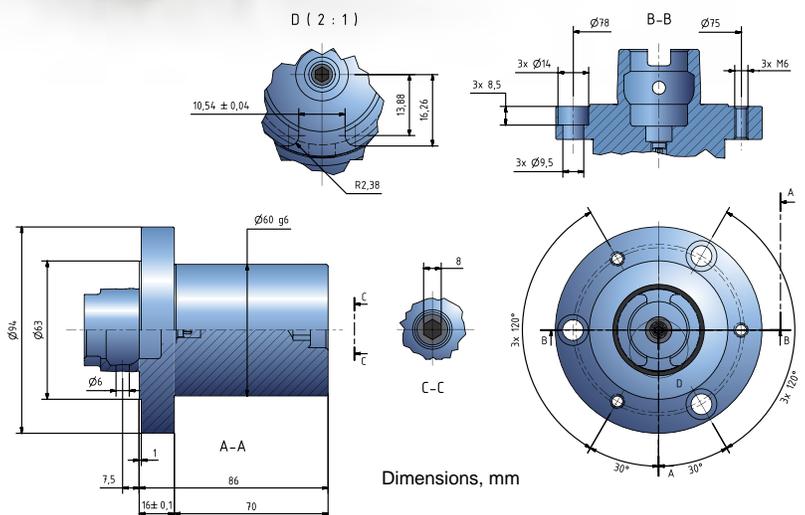

ETP HYDRO-GRIP® GE2 HSK 63F mod.

This is the latest extension of our popular product line hydraulic arbors, designed for Homag through feed machines with HSK 63F modified motor spindle.

The new series include versions for single tools or tool sets with bore, and also units for adjustable tool sets. The later makes an excellent combination together with the adjustable unit, CUBIT mini.

The new products share the same benefits as all our hydraulic arbors, high performance due to excellent centering and balancing – the ultimate centering and fastening solution for your tools.

Existing tools or new tool sets can be switched between assembly on ETP HYDRO-GRIP type EI sleeves (used on machine spindles with hexagon) and the GE2 HSK 63F mod., which is suitable for flooring-, edge banding, double end tenoner machines.

Technical specification

Part no.	Item description
662397	GE2-60x70/HSK63F mod.

The type GE2 HSK 63F mod. is designed for Homag through feed machines with HSK 63F modified motor spindle.

Recommended tool tolerance H7.

Pressurizing is carried out with an allen T-wrench, size 8 mm. Recommended tightening torque is 10 Nm.

Reduction Sleeves for ETP Toolholders

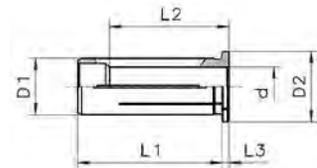

The reduction sleeves are designed to fit with the ETP Toolholders type G2 and PENCIL. They are specially suited for high precision clamping of cylindrical tool shanks.

Benefits and features

- **Accurate precision:**
High runout accuracy < 3 µm.
- **High flexibility:**
Clamping of different tool shank diameters. 12, 20, 25 and 1/2", 3/4", 1".
- **Power increase:**
When using reduction sleeves the transmittable torque is increased.

Outer-Ø of reduction sleeve corresponds to the type.
 HS12 = Ø 12 mm
 HS20 = Ø 20 mm
 HS25 = Ø 25 mm

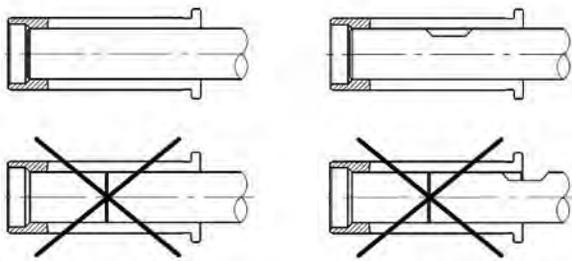

Reduction Sleeves mm to mm

HYDRO-GRIP® Torque Wrench

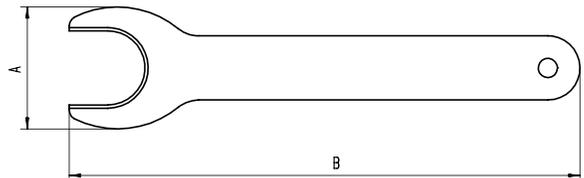

Use torque wrench to ensure correct tightening independent on user. Should be used with all HYDRO-GRIP® holders, type G2, G3 and PENCIL. Torque: 6 Nm.

Item description	Tightening torque:	Part no.
● Torque wrench 6 Nm 5 mm Hex	6 Nm	19050
● Torque wrench 10 Nm 5 mm Hex	6 Nm	19052

Extractor

Item description	Part no.	For Sizes	A [mm]	B [mm]
● EHS 12 - 1/2"	E7321.12000	HS 12	24.6	100
● EHS 20 - 3/4"	E7321.20000	HS 20	38.0	160
● EHS 25 - 1"	E7321.25000	HS 25	51.0	180

The extractor helps to remove the reduction sleeve from the toolholder.
